

I strongly urge you NOT to in any way diminish the impact of Indiana's Telephone Privacy law. Implementation of that law has restored the sanctity of our privacy at our home. We have been able to focus quality time with our family without the harrassing and invasive interruptions by telemarketers et al. We used to get several calls a week from phone, insurance, investment, home improvement, etc... that we no longer have to deal with due to Indiana's law. Please do not give these predatory telemarketers an inch of ground back. Thank you for considering my request.
